PROFILE

Passionate Full Stack & Mobile Developer skilled in building complete web and mobile solutions using Laravel, Vue.js, and Flutter. Experienced in developing modern, responsive, and scalable applications from front-end to back-end, with a strong focus on clean code, performance, and user experience.

SKILLS

- Back-end development using Laravel (PHP Framework)
- Front-end development using Vue.js
- Mobile app development using Flutter & Dart
- RESTful API integration between web and mobile platforms
- Database management with MySQL
- Responsive UI design with HTML, CSS, and Bootstrap
- Version control using Git & GitHub
- Deployment and maintenance of web and mobile apps

PROJECTS

• E-Commerce Web Store — Vue.js

Responsive e-commerce web app using Vue.js (Options API) with Pinia for state management, Vuetify for UI components. Features include product categories, featured and new products, Swiper-based UI, shopping cart, and contact section.

• League Management System — Flutter

Mobile application for managing football leagues in Hadramout using Flutter and Firebase. The system supports multiple user roles (players, coaches, team managers, officials, and fans) with features for team management, match organization, and league administration.

• Restaurant Management System — Laravel and MySQL

Web-based restaurant management system using Laravel and MySQL. The platform allows users to browse the menu, place orders, add items to cart, and book tables, along with viewing weekly offers and discounts. The admin panel manages users, menu items, prices, staff, chefs, and reservation requests.

• Pulse Cart — Flutter and Laravel

Mobile app using Flutter and Laravel REST API with MySQL database. The app supports email authentication, bilingual interface (Arabic/English), product browsing by categories, product details, cart, and order placement.
